

HEADED CLEVIS PINS

• **NEW for 2026!**

36 STANDARD SIZES AVAILABLE:

From 1/2" diameter to 1-1/2" and lengths from 1" to 4"

Applications

- Tractors and ag implements
- 3-point hitch systems
- Manufacturing jigs and fixtures
- Adjustable machine components
- Equipment pivots and linkage assemblies

Material & Finish Options

- Carbon steel (zinc-plated)
- Stainless steel (custom)

Engineered for strength. Designed for speed.

Our new line of headed clevis pins delivers superior load distribution and secure, tool-free fastening for agricultural and manufacturing applications. Paired with durable hair pin clips, these pins provide reliable retention, quick changeouts, and long-lasting performance. Built to handle the toughest jobs, they keep your equipment connected and your operation moving.

Stronger Connections for Ag & Manufacturing

Miller Products Company expands its in-stock fastener solutions with new Headed Clevis Pins, engineered for durability in agricultural and manufacturing environments. These pins integrate seamlessly with our existing clevis and quick-pin product families, offering OEMs and operators stronger, more reliable solutions.

Designed for High-Load, High-Vibration Performance

The washer-style head distributes weight evenly, reducing wear and extending equipment life. Paired with a secure, tool-free hair-pin clip, these pins excel in a variety of applications—from tractors and implements to production machinery and adjustable fixtures.

Deepen Inventory. Lower Costs. Streamline Production.

With their addition to our catalog, manufacturers can reduce SKUs, consolidate suppliers, and simplify ordering. More versatile in-stock options mean lower inventory costs and better production flow.

Compatible with Existing Miller Fasteners

Pairs effortlessly with current clevis pins, quick pins, hitch pins, and more.
